MOTIVATIONAL QUOTE

"And speak gently to people and do not be harsh or coarse in your speech."

(Luqman, 31:17)

Conference as A Platform for Knowledge Sharing

The conference featured a variety of keynote speeches and research presentations related to the theme: "Fostering Sustainable Digital Transformation through Technological Innovation." Keynote speakers from Taiwan, India, Indonesia, and Australia shared their insights.

The conference included five tracks covering a wide range of topics, with nearly 200 scholars presenting their papers both physically and virtually. The scholars shared their findings, enriching intellectual discussions and exploring potential academic and research collaboration.

Interactive Workshops

In addition to the main conference sessions, several hands-on workshops were conducted, allowing participants to gain practical skills in brain analytics, computational intelligence and empirical evidence. Notable workshops included "Introduction to QEEG and Neurofeedback", which explored the intersection of neuroscience and artificial intelligence, "A Beginner's Guide to LLMs with Python", focusing on the latest advancements in natural language processing, and "Systematic Literature Review (SLR) and Writing in Top Journal", which provided practical insights on conducting comprehensive literature reviews in research. Trainers included experienced practitioners and researchers from KICT, IUM who shared their expertise, ensuring that attendees left with respective knowledge and skills. The participants included both IUM members and external attendees.

Postgraduate Colloquium

The postgraduate colloquium provided a platform for postgraduate students to present their research and receive valuable feedback from experts in the field.

This session not only enhanced the academic experience of the students but also encouraged networking and collaboration among emerging scholars from institutions in Malaysia and Indonesia. A total of 13 participants from KICT, IUM, and external universities took part in this session.

Student Exchange Program

One of the standout features of the conference was the activity of a student exchange program. This initiative aims to strengthen ties between the universities and provide students with opportunities to experience different academic and cultural environments. Students engaged in cultural exchanges, attended lectures, and participated in collaborative projects, enriching their educational journeys.

Eleven students from IIUM participated in this program, while 15 students from various universities in Indonesia also took part, including Universitas Raharja (UR), Universitas Catur Insan Cendekia (UCIC), and Universitas Ichsan Satya (UIS).

Gala Dinner and Cultural Exchange

The conference concluded with a gala dinner that celebrated the successful collaboration between the two universities with theme – “Where Tradition Meets Elegance”. This elegant event provided a formal setting for networking and also featured cultural performances. Attendees enjoyed a delightful evening with traditional and modern music. In addition to the entertainment, the dinner included a prizing ceremony for the Best Dressed, recognizing participants for their creativity and style. The dinner was a memorable occasion, where participants had the opportunity to reflect on the conference’s success while building lasting connections. Additionally, the event featured a special award ceremony recognizing outstanding contributions to the conference.

Tour of Local Attractions

As a grand event to the conference, a guided tour of local attractions was organized, allowing participants to explore the vibrant history and culture of Malaysia. The tour included visits to iconic sites such as Batu Caves and Genting Highlands, offering a unique blend of natural beauty and cultural heritage.

This excursion provided an opportunity for informal discussions and further strengthened the relationships formed during the conference. A total of 60 participants took part in the tour, enjoying both the scenic views and the chance to connect outside the formal conference setting.

The collaborative international conference between KICT and the Indonesian university was a success, creating an impactful platform for knowledge exchange, cultural appreciation, and academic and research collaboration. As both institutions look towards the future, they are committed to continuing this partnership, fostering innovation, and advancing research in the ICT domain. The conference not only enriched the academic landscape but also strengthened the bonds between Malaysia and Indonesia, creating the foundation for future collaborations in research and education.

WEEKLY IOHK TIPS

IJTIHAD (INDEPENDENT REASONING) IN THE CLASSROOM

The role of the lecturer during the teaching of the material is to:

- Teach students the importance of basing their judgments on primary sources, starting with the Quran then Sunnah, and only using Ijtihad (personal reasoning) when these sources do not provide a direct answer.
- Equip students with the proper methods for approaching situations that require personal judgment.
- Encourage creativity and innovative thinking, especially when facing modern challenges in Islamic education and life.
- Inspire students to think critically, explore new ideas, and not fear making mistakes during the learning process.

قال رسول الله صلى الله عليه وسلم: إذا اجتهد الحاكم فأخطأ فله أجر وإن أصاب فله عشرة أجور (المعجم الأوسط).

The Messenger of Allah (peace be upon him) says: **When a ruler makes Ijtihad (strives to form a judgment) and errs, he receives a reward. And if he is correct, he receives ten rewards** (Al-Mu'jam Al-Awsat).

عن معاذ بن جبل لما بعثه رسول الله صلى الله عليه وسلم إلى اليمن، قال: كيف تقضي إذا عرض لك قضاء؟ قال: أقضي بكتاب الله. قال: فإن لم تجد في كتاب الله؟ قال: فبسنة رسول الله صلى الله عليه وسلم. قال: فإن لم تجد في سنة رسول الله صلى الله عليه وسلم؟ قال: أجتهد رأيي ولا ألو. فضرب رسول الله صلى الله عليه وسلم صدره وقال: الحمد لله الذي وفق رسول الله لما يرضي رسول الله. (سنن أبي داود).

When the Messenger of Allah (peace be upon him) sent Mu'adh ibn Jabal to Yemen, he asked him: 'How will you judge if a matter comes before you?' Mu'adh replied, 'I will judge by the Book of Allah.' The Prophet then asked, 'And if you do not find it in the Book of Allah?' Mu'adh responded, 'Then by the Sunnah of the Messenger of Allah.' The Prophet further asked, 'And if you do not find it in the Sunnah of the Messenger of Allah?' Mu'adh said, 'I will exert my opinion (Ijtihad) to the best of my ability.' The Prophet then struck his chest and said, 'Praise be to Allah who has guided the messenger of the Messenger of Allah to what pleases the Messenger of Allah. (Sunan Abu Dawood):

Allah Almighty says: **Indeed, in the creation of the heavens and the earth and the alternation of the night and the day are signs for those of understanding * Who remember Allah while standing or sitting or [lying] on their sides and give thought to the creation of the heavens and the earth, [saying], "Our Lord, You did not create this aimlessly; exalted are You [above such a thing]; then protect us from the punishment of the Fire.** (Al Imran: 190-191)

The Messenger of Allah (peace be upon him) says: **Whoever introduces a good practice in Islam, which is followed after him, will have the reward for it and the reward of those who act upon it without their rewards being diminished in the least.** (Sahih Muslim).
