## Message from the Editor

*Assalamu'alaikum warahmatullahi wabarakatuh,*

It is my great pleasure to welcome you to the 8th issue of KICT Spectrum. This newsletter serves as a reflection of our collective journey celebrating achievements, sharing knowledge, and strengthening the spirit of our community.

In this edition, we showcase the outstanding contributions of our staff and students, including staff mobility, community engagement activities, postgraduate achievements, impactful workshops, research publications, and insightful talks and seminars. These accomplishments not only highlight individual excellence but also reinforce KICT's position as a hub of knowledge and innovation.

As we look ahead, I encourage everyone to remain steadfast in upholding academic excellence, advancing research, and fostering meaningful collaboration. Your dedication whether through teaching, research, or service to the community is what enables KICT to continue thriving.

I would also like to express my sincere appreciation to all contributors and the editorial team for their commitment in bringing this newsletter to life. May it serve as a source of inspiration and connection for us all.

Best regards,  
Hazwani

*Lampung, 19 August 2025* - The mobility and data collection programme under PCBDG and PSC Research Group involved three lecturers, namely Assoc Prof Ts Dr Hamwira Yaacob, Asst Prof Ts Dr Dini Handayani, and Asst Prof Dr Atikah Balqis. At the same time, the students are Mas Azlan, Aliff Azmeer, Megat Arif Ilhma, and Amirul Hilmi. The programs were designed to provide exposure to the fields of EEG brainwave research, incorporating academic, cultural, and community activities.

## UNIVERSITAS TEKNOKRAT INDONESIA (UTI) LAMPUNG

The team participated in the Indonesian Independence Day ceremony, fostering cultural understanding and strengthening relationships with local partners. An official implementation agreement was signed to formalize ongoing collaboration. An international collaborative visiting lecture was conducted with the speaker from IIUM as well as UTI. From IIUM, Dr. Hamwira presented on Introduction to Brain Computer Interface Research, while Dr. Dini shared The Procedures for EEG data collection. On the other hand, from UTI, Dr. Sampurna gave the lecture on Cognitive Radio Network. UTI also facilitates the IIUM team's data collection efforts. The data collection was carried out with 32 participants, administering questionnaires and experimental protocols in parallel rooms, supervised by lecturers.

### SMK 4 BANDAR LAMPUNG (COMMUNITY SERVICE)

Still in Lampung, we went to SMK 4 Bandar Lampung for a community service activity. SMK 4 Bandar Lampung is a public vocational school specializing in computer and telecommunication network engineering, software and game development, visual communication design, and office management and business services. The program was collaborated with UTI. IIUM students demonstrated the EEG brainwave machines while UTI showcased their metaverse projects. Dr. Atikah delivered a cultural talk on Malaysia, enriching cross-cultural exchange.

## UNIVERSITAS NUSA MANDIRI (UNM) JAKARTA

And lastly, our last city for the research trip destination is Jakarta. In Jakarta, the IIUM team visited University Nusa Mandiri. The visit started with an online meeting with two deputy rectors and four heads of department under SE, IT, CS, and Data Science. The International Office and Marketing Department were also involved. The meeting explored opportunities for teaching, learning, and research collaboration. UNM has three different branches. During our visit, we only had the chance to visit the Margonda campus. Although the campus is not large, the facilities are very good. The library offers a convenient space, a discussion room that doubles as a podcast room, and a postgraduate lab equipped with high-end technology to facilitate student research. An MoU between IIUM and UNM was proposed to strengthen the collaboration between the two institutions.

### Closing Note

This programme successfully combined research, cultural exchange, teaching, and community service. It strengthened international collaboration while providing valuable experience for both lecturers and students.

# MYRA TOUR: EMPOWERING KICT ACADEMIC STAFF TO BOOST RESEARCH CONTRIBUTIONS

By TS. DR. HAZWANI MOHD MOHADIS  
Head of Research and Innovation  
hazwanimohadis@iium.edu.my

*Gombak, 2 September 2025* - The Research Excellence Unit of Research Management Centre (RMC) held a dedicated MyRA Tour workshop for

KICT academic staff on Tuesday, 2 September 2025, from 2:30 pm to 4:30 pm. The session was designed to raise awareness and strengthen contributions to the university's Malaysia Research Assessment (MyRA) report, with a particular focus on Section B4, G3, and G5, which cover awards, recognitions, memberships, and stewardship roles.

RMC observed that contributions in these categories were relatively low and emphasised the need for academic staff to systematically record their achievements. To address this gap, the MyRA Tour provided briefing on how to use MyRepo (the MyRA Repository & Contribution) System, which was introduced by RMC in 2021 to capture a broad range of academic and research-related accomplishments.

The session was facilitated by Madam Rafidah Mat Desa from the Research Excellence Unit, RMC, who explained the key features of MyRepo. The system enables staff to deposit information such as national and international awards, prestigious recognitions, committee leadership roles, stewardship responsibilities, gifts, donations, and endowments. MyRepo ensures that these contributions are aligned with MyRA reporting requirements, ultimately enhancing the university's performance in national assessments.

The workshop also provided an overview of benchmark targets and the scoring mechanisms used in MyRA. Madam Rafidah demonstrated how individual marks are calculated for various categories and shared strategies for achieving a six-star rating. Through live simulations, participants were able to see how properly entering their achievements into MyRepo could significantly improve both their individual and kulliyyah scores.

Participants were encouraged to bring their laptops, making the session highly interactive. This practical approach enabled staff to practice data entry in real time and provided immediate feedback on how their inputs would be reflected in the MyRA system.

For access to slides and resources shared during the session, please refer to the email circulated on 2 September 2025 by the Office of Research and Innovation ([kict\\_hori@iium.edu.my](mailto:kict_hori@iium.edu.my)). These include MyRA infographics, a digital flipbook ([heyzine.com/flip-book/d169bffe2f.html](https://heyzine.com/flip-book/d169bffe2f.html)), and the presentation slides presented by Madam Rafidah.

The MyRA Tour initiative demonstrates IIUM's commitment to nurturing a culture of research excellence and ensuring that the diverse contributions of its academic community are properly documented and recognised at the national level.

# FROM RESEARCH TO COMMERCIALIZATION: TTO ROADSHOW HIGHLIGHTS THE NEW ROLE OF ACADEMIA

By TS. DR. HAZWANI MOHD MOHADIS  
Head of Research and Innovation  
hazwanimohadis@iium.edu.my

**Gombak, 2 September 2025** - The Technology Transfer Office (TTO), RMC brought together academics from KICT, AIKOL, INHART, AHAS, and KIRKHS for its Roadshow at the Dar Al-Hikmah Library, IIUM Gombak. More than just a briefing on intellectual property (IP) and research commercialisation, the event highlighted a growing movement: the need for academics to expand their value beyond teaching and research into entrepreneurship and societal impact.

Established in June 2023, IIUM's TTO is tasked with managing intellectual property and guiding researchers through the often-complex pathway to commercialisation. Its mission is clear: to nurture shariah-compliant innovations and transform research into real-world impact, in line with IIUM's philosophy of *Rahmatan lil-'Alamin*.

The TTO supports academics by providing the following services:

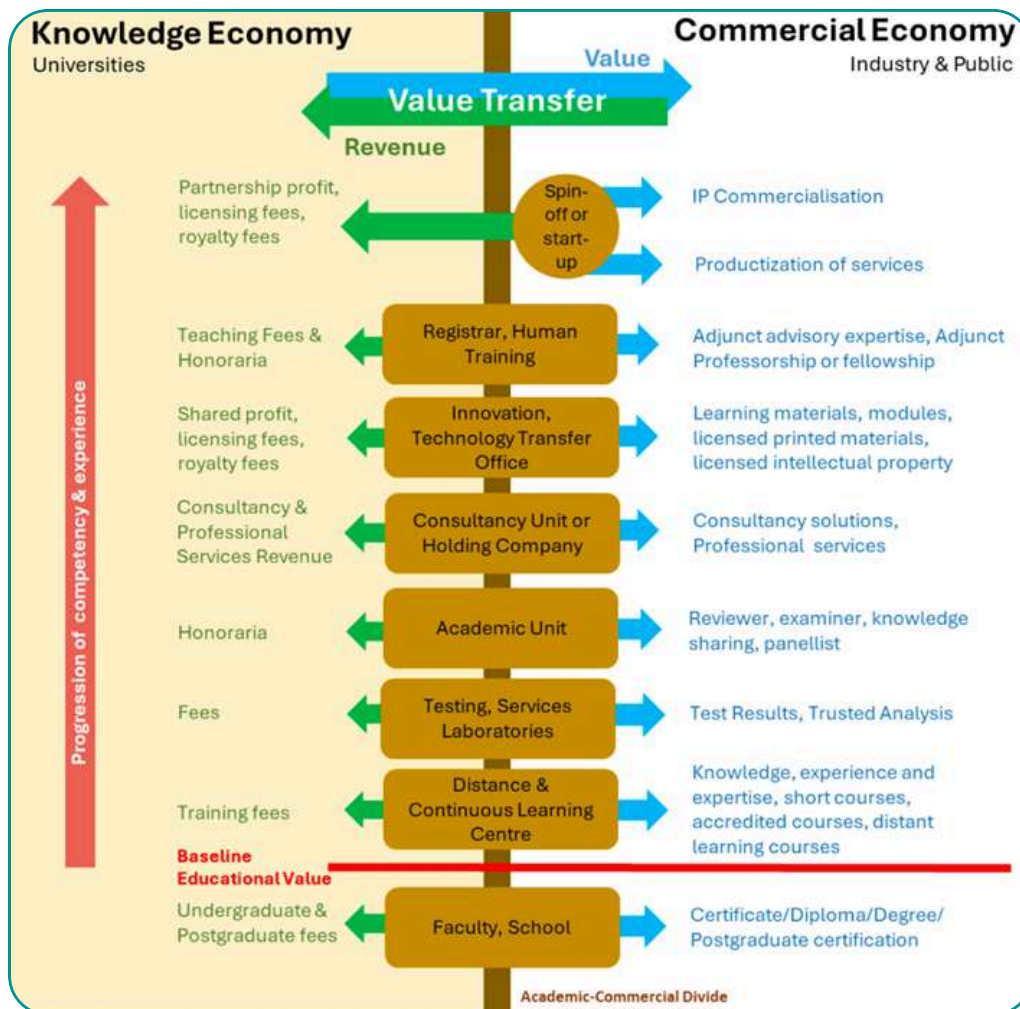

These services and support ensures that researchers are not left alone but are equipped with the tools, funding, and networks to succeed.

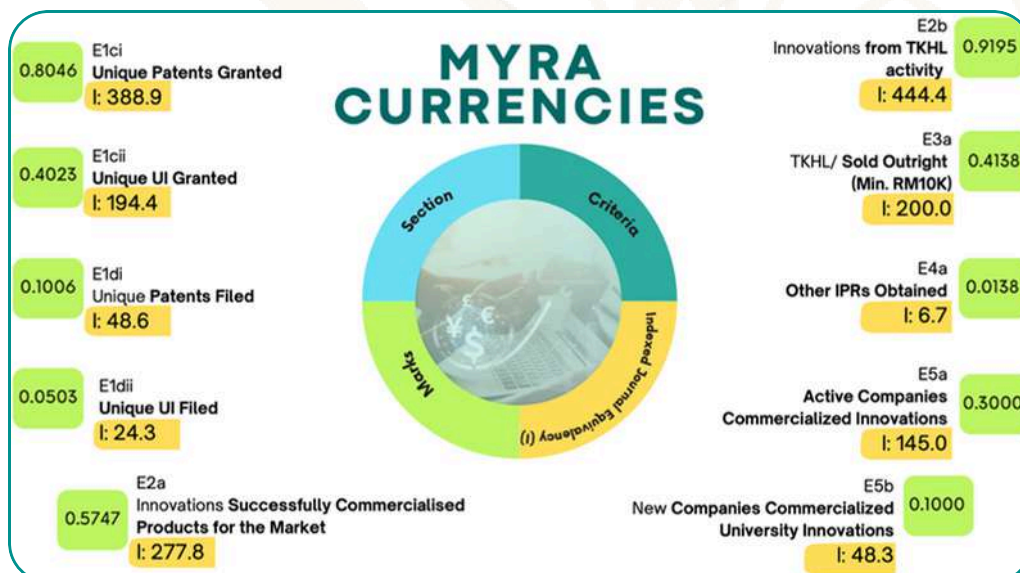

## THE EVOLVING ROLE OF ACADEMIA

For centuries, universities were viewed as “ivory towers”, dedicated to teaching and research, often isolated from society's pressing needs. Today, however, higher education is undergoing a paradigm shift. Institutions are now expected to serve as entrepreneurial engines that contribute directly to economic growth, social well-being, and cultural development.

This shift means that academics are not only educators or knowledge producers but also innovators, consultants, and entrepreneurs. Their ideas are increasingly measured by the impact they generate outside campus walls whether through solving industry problems, creating start-ups, or delivering community benefits.

Academic-Commercial divide, highlighting the role of academic beyond classroom

Patents and commercialization contribute to MYRA section E marks. Each unique patent granted for example is equivalent to 388 indexed journal publications.

## COMMERCIALISATION PATHWAYS

At the roadshow, participants explored three main pathways to bring their research to the market: 1) Licensing; 2) Outright Sale; 3) Start up formation.

Licensing	Outright Sale	Start-Up Formation
Granting permission to another party (usually a company or individual) to use, produce, market, or sell a university- owned IP in exchange for specific terms, conditions, and usually, financial compensation.	Transfers full ownership and control of an IP asset to another party for a one-time payment	A new company established by IIUM academic staff with University Management Committee (UMC) approval. Focused on commercialising intellectual property (IP) resulting from university research.

Dr. Mohd Fadzil Mohd Akhir and supported by UMT's Innovation & Commercialization Centre, the company develops tools for forecasting, modeling, and visualization to aid maritime decision-making. Its flagship product, the Malaysia Marine Forecast System (MFAST), positioning Ocean Hydro as Malaysia's first fully in-house ocean forecast system operator.

Prof. Dr. Farahidah Mohamed  
(Kulliyah of Pharmacy)

## LOOKING AHEAD

The TTO Roadshow was a reminder that the university's mission is no longer confined to lectures and publications. By commercialising research, academics can become **active contributors to industry, economy, and community development**. Each innovation carries the potential to deliver khair (goodness) to society. With the right support, IIUM academics are well-positioned to step out of the ivory tower and make their knowledge truly transformative.
