WELCOME TO

Department of Ophthalmology

It is my pleasure to invite you to join this journey to becoming a skilled and compassionate ophthalmologist through the Master of Surgery (Ophthalmology) programme at the International Islamic University Malaysia (IIUM). This programme was designed not just to train you in clinical skills and surgical techniques, but also to shape you into a well-rounded professional who upholds strong ethical values and Islamic principles in patient care. Our vision is to become the centre of excellence in ophthalmology training, research and service, and to improve the standard eye healthcare in the region.

Dr Aidila Jesmin Jabbari
Head of Department

VISION & MISSION

*Department of Ophthalmology,
Kulliyyah of Medicine, IIUM*

Our vision and mission are
to achieve excellence in clinical services and
the leader in academic and medical research.
We are committed to become the center of
excellence in ophthalmic training.

PROGRAMME EDUCATIONAL OBJECTIVES

1

Deliver effective, person centred, Islamic oriented and value-based care by applying evidence-informed medical knowledge and clinical skills to problem solve, manage and coordinate care.

2

Demonstrate ethical conduct, professionalism, Islamic values and commitment towards career growth and lifelong learning.

3

Become a leader in Ophthalmology by contributing to education, research and promoting better healthcare services to the local, national, and international community.

PROGRAMME LEARNING OUTCOMES

Acquire in-depth knowledge and understanding of ophthalmology in terms of theory, clinical and practical skills.

Apply evidence-based medicine, critical thinking, problem-solving skills to make effective clinical decisions to manage patients.

Demonstrate clinical, procedural & technical skills to function as ophthalmologist and manage based on the current evidences.

Communicate effectively with peers, patients and family from various cultural, social and religious backgrounds.

Use current and appropriate technology to demonstrate ability in analysing quality or quantitative data to improve decision-making in-patient care.

Demonstrate the highest standard of professionalism, leadership skills and teamwork in managing the clinical team and providing services.

Demonstrate lifelong learning ability for personal and professional development.

Apply managerial and entrepreneurial skills in research and patient management.

Incorporating Islamic values, ethics, and perspectives into patient safety and medical jurisprudence.
